Experience

FULL STACK DEVELOPER

SEATERY 04/2020 – PRESENT

A mobile and desktop platform that enables attendees at major sporting venues to enjoy the experience more by seamlessly ordering through nearby concessions and having a connected user deliver items without having to leave their seat.

- Manage a progressive web page that is dynamically changed based on user feedback and trending issues utilizing React.js library to create forms and retrieving data and allocation of data via Axios.
- Continuously integrate web API using C# and ASP. NET to retrieve and retain data by utilizing SQL database management library.
- Involved throughout the full development cycle of planning, designing, development, testing and implementation of 35 database tables, 200+ stored procedures, and seamless data allocation with joins, foreign keys, and user defined tables.
- Extensive utilization of Chrome and React developer tools, PostMan, and Visual Studio throughout the project development cycle.
- Participate and promote process improvements in daily stand up.
- Demonstrate a strong sense of team; contribute to maintaining the energy of the teams through inclusiveness and connection with people; breed positive morale and commitment

U.S. Navy Reserves

JUNE 2009 – PRESENT

- Provide port and harbor security, and offshore protection for maritime infrastructure, high value assets and Military Sealift Command ships operating in coastal waterways.
- Provide essential assistance in vehicle maintenance of active duty personnel equipment to ensure 100% operational readiness.
- Demonstrate proficiency in all Coastal Riverine force training. (i.e. Defensive tactics, weapons handling, and combat lifesaver techniques)
